

Radio trigger battery safety information

English

The radio trigger contains a Lithium coin/button cell battery with inherent risks if not used correctly or damaged.

- Battery category: Portable battery of general use
- Place of manufacture: Indonesia, China
- General information on the battery, MSDS, Datasheet etc.:
<https://www.varta-ag.com/en/industry/product-solutions/lithium>
- VARTA Consumer Batteries GmbH & Co. KGaA, Alfred-Krupp-Str. 9, 73479 Ellwangen, Germany

Lithium batteries can cause potential chemical burn hazards associated with ingestion. If swallowed or placed inside any part of the body, seek immediate medical attention.

Keep batteries away from children.

- Battery replacement may be performed only by authorised persons.
- Only use batteries recommended and designated for the product.
- Do not disassemble, crush, puncture, or damage batteries.
- Keep batteries safely stored in a cool and dry place, store them in their original packaging or a designated container, and avoid exposing them to extreme temperatures or moisture.
- If a fire occurs: Copious amounts of cold water is an effective extinguishing medium for lithium batteries. Don't use warm or hot water. Don't use Halon type extinguishing material. You may use dry powder, sand or soil.
- **Warning!** Swallowing may lead to burns, perforation of soft tissue, and death. Severe burns can occur within 2 h of ingestion. In case of ingestion of a cell or battery, seek medical assistance promptly.
- Seek immediate medical attention if it suspected that batteries have either been swallowed or placed inside any part of the body
- Battery weight 3g

Consult the Material Safety Data Sheet (MSDS) for safety, first aid- and fire extinguishing measures, hazardous substances, critical raw material and other important information.

Immediately remove empty batteries, store and dispose them properly.
