

Introducing rSIM

The World's First Intelligent SIM

01

What is rSIM?

World's first truly resilient SIM card.
Device agnostic and constantly monitors connectivity.
Uses patented technology to actively switch profiles to maximise uptime and minimise downtime.

rSIM

02

How Does rSIM Work

rSIM continuously monitors its own network connection. If it detects an outage, it actively switches to an alternate mobile operator profile.

03

Features

- Exceeds functionalities of a typical roaming SIM
- Maintains end-to-end data connectivity and a smooth data transfer to ARCs
- Actively switches profile
- Always on, never off

04

Significant Benefits

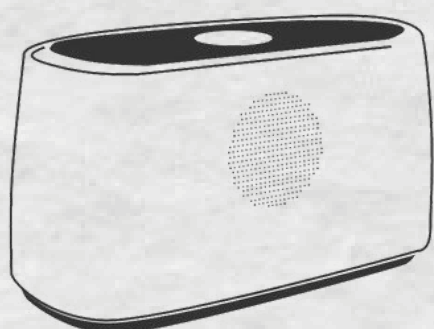

- Uninterrupted Service
- Enhanced Data Security
- Cost Effective
- Increased Reliability

05

Availability & Cost

Available during July for enhanced connectivity solutions

No additional costs for rSIM

06

Existing Customers

Compatible with all Eliza digital smartcare hubs

Offers seamless integration with dual connectivity solutions (Ethernet, WiFi)

Careium®

Always On. New resilient technology. rSIM
